

Desktop Security Suite

With Falcon Technology's DESKTOP SECURITY SUITE, your desktop and laptop computers are protected 24/7/365 against a host of threats. In addition to the included AVG Anti-Virus Network Edition, you also benefit from anti-spyware from CounterSpy and pro-active deployment of critical Windows security patches. Patches are only deployed after they've been tested and approved as safe to install by our lab.

Also, as part of our Desktop Security Suite, we constantly perform "housekeeping" to keep your computers running at their highest efficiency. Removing temporary files and monitoring disk space usage allows us to alert you to issues and take action before they become problems that can lead to a loss of productivity.

DESKTOP SECURITY SUITE INCLUDES:

- Anti-Virus Updates
- Hardware & Software Asset Collection
- Temporary File and Internet Debris Removal
- Microsoft Patch Assessment
- Logical Disk Space Check
- Spyware Scan & Removal
- Security Patch Deployment
- S.M.A.R.T. Monitoring Check
